

CONSOLIDATED LABORATORY SERVICES

"Continued Commitment to Quality and Service"

BREAKING NEWS!

FOR OFFICES PERFORMING PAP TESTING

CONSOLIDATED LABORATORY SERVICES is pleased to announce that **effective Tuesday, April 1, 2003 we will begin transitioning from AutoCyte to the ThinPrep® PAP test.**

We believe most offices will view this change in a positive manner, as many of you have inquired or requested that we offer this product. Use of ThinPrep® will allow specimens to be sent to CONSOLIDATED LABORATORY SERVICES, thereby:

- Improving the service to your BlueCross BlueShield – PPO/PPC, Medicare and TRICARE patients;
- Minimizing confusion of which device to use;
- Providing 2-3 day turnaround time on most patient results;
- Ensuring all high-grade dysplasias and malignant diagnoses are phoned to your office by our board-certified pathologists and;
- Continuing to provide your office with excellent customer service.

Offices that use the CONSOLIDATED LABORATORY SERVICES “Approved Insurance Plan” list will be pleased to know that ThinPrep® is paid by all insurance plans that cover routine and diagnostic testing.

A representative from CONSOLIDATED LABORATORY SERVICES or ThinPrep® will be contacting you soon to discuss this exciting change. If you have additional questions or concerns prior to hearing from your representative, you may contact Robin Omesol at 308-5605.
